

ACTIVITY 1 — LEARNER WORKSHEET**PMP Exam Orientation and Study Plan**

TYPE	DURATION	MAPS TO	TOPIC
Workshop	60 minutes	LO1	1 - Business Environment

What you are doing

Contoso Learning Pte Ltd is a training provider with 14,000 active learners. Its course registration portal is 9 years old. Registration takes a median of 11 minutes and 34% of attempts are abandoned. Learner communications consume 24 staff-hours per week across 3 administrators. 62% of learner traffic is mobile, against a portal that is not responsive. Legacy consent screens do not meet current PDPA requirements. The project modernises course registration and learner communications.

What you will produce: exam blueprint, study plan, pdu log — submitted to artifacts/.

What you need before you start

- Nothing - this is the entry lab

Your steps

1. Build the exam blueprint from the ECO 2026 numbers. Create artifacts/01-exam-blueprint.md and complete this table. The totals are given; derive the per-domain question counts yourself.
2. Log the six question types. The July 2026 ECO added graphic-based items. List all six types and, for each, write one sentence on how you will approach it under time pressure.
3. Record your 35 contact-hour evidence. PMI requires 35 contact hours of project management education. This course supplies all 35 in one record. Create artifacts/01-pdu-log.md:
4. Build a 6-week study plan weighted to the blueprint. Study time should follow exam weight, not personal comfort. Since Process is 41% of the exam, it gets the most hours.
5. Write your answer-selection heuristics. Most PMP questions are situational and several options are defensible. What separates the keyed answer is usually a mindset, not a fact. Write these into your notes and apply them in every scenario question from Lab 02 onward.
6. Apply the heuristics to three scenarios. Answer each in writing. State your choice, then name which heuristic decided it.
7. Set your baseline score. Answer 20 practice questions of any source, timed at 80 seconds each, and record the result:

Your working space

Complete every field. Keep this worksheet — it is your reference for the rest of the course.

Step 1 — Build the exam blueprint from the ECO 2026 numbers**Step 2 — Log the six question types**

Step 3 — Record your 35 contact-hour evidence

Step 4 — Build a 6-week study plan weighted to the blueprint

Step 5 — Write your answer-selection heuristics

Step 6 — Apply the heuristics to three scenarios

Step 7 — Set your baseline score

Deliverable checklist

- 01-exam-blueprint.md - the completed domain table with derived question counts and the 80-second pacing rule.
- Six question-type rows, each with your approach.
- 01-pdu-log.md - the completed 35-contact-hour evidence record.
- 01-study-plan.md - the 6-week weighted plan.
- Your written answer-selection heuristics.
- Written answers to the three scenarios, each naming the deciding heuristic.
- Your baseline score table.
