

ACTIVITY 4 — CHECKLIST**Compliance, Sustainability and AI-Governance Register**

TYPE	DURATION	MAPS TO	TOPIC
Workshop	75 minutes	LO4	1 - Business Environment

Name	
Date	

Self-check — Compliance, Sustainability and AI-Governance Register

Tick each item you have completed. Any blank is a gap to close before your group presents at the debrief.

#	Criterion	Evidences	✓
1	Your register covers all four ECO compliance categories. If every row says "regulatory", you have not classified anything.	LO4	
2	Every requirement names specific verification evidence - a document, a test, a scan - not "review".	LO4	
3	Your consequences table contains at least one number large enough to justify the compliance workstream's cost. If compliance looks cheaper to skip, your analysis is incomplete.	LO4	
4	Compliance is expressed as a measurable fraction, and you can state today's value.	LO4	
5	Your sustainability plan addresses the three admin staff. A plan covering only carbon has missed the social dimension.	LO4	
6	Every AI use in your register names an accountable human. If any row's accountability is "the tool", redo it.	LO4	
7	At least one compliance activity is deliberately pulled early in the schedule to avoid late discovery, and you can say which and why.	LO4	

Debrief check

Your register covers all four ECO compliance categories. If every row says "regulatory", you have not classified anything.
