

ACTIVITY 6 — CHECKLIST**Project Charter**

TYPE	DURATION	MAPS TO	TOPIC
Workshop	75 minutes	LO1	2 - Start the Project

Name	
Date	

Self-check — Project Charter

Tick each item you have completed. Any blank is a gap to close before your group presents at the debrief.

#	Criterion	Evidences	✓
1	Every success criterion has a numeric baseline and a numeric target. "Improved registration" is not a success criterion.	LO1	
2	Your charter has a sponsor signature block, and you can explain why the PM's signature alone would not authorise anything.	LO1	
3	Every exclusion has a rationale traceable to an earlier lab's evidence.	LO1	
4	Your milestone list contains milestones only - if it contains activities with durations, that belongs in Lab 12.	LO1	
5	Your PM authority section states specific figures for procurement and change approval, consistent with the Lab 03 thresholds.	LO1	
6	Your approach decision names both what is predictive and what is adaptive, and explains the interface between them. "Hybrid" alone is not a decision.	LO1	
7	Every assumption has a validation date earlier than the point at which being wrong would be unrecoverable. Check A-05 in particular.	LO1	
8	You can state the difference between contingency reserve and management reserve, and who controls each.	LO1	

Debrief check

Every success criterion has a numeric baseline and a numeric target. "Improved registration" is not a success criterion.
