Self-check — RACI Responsibility Assignment Matrix and Resource Plan

Tick each item you have completed. Any blank is a gap to close before your group presents at the debrief.

#	Criterion	Evidences	✓
1	Every one of your 25 rows has exactly one A and at least one R. Count them; do not assume.	LO2	
2	You resolved the two-A defect on the compliance evidence pack by SPLITTING the task, not by demoting the DPO or the PM to C.	LO2	
3	You found the row with no R, and you can say why that row belonged to the dependent stakeholders from Lab 07 rather than to anyone powerful.	LO2	
4	Your R-per-column count identified the BA at 14 of 24 rows, and you connected that to the Lab 16 storming diagnosis as a structural cause rather than a behavioural one.	LO2	
5	You challenged every C with the question "would their input change the work?" and you demoted at least one C to I with a stated reason.	LO2	
6	Your resource histogram has an explicit capacity line and you stated the total demand (320 hours) against total capacity (288 hours) before choosing a remedy.	LO2	
7	You can state, without looking it up, that levelling can change the critical path and extend the end date while smoothing works within float and cannot.	LO2	
8	You rejected levelling for Contoso on the specific ground that it pushes the G1 design baseline and therefore the critical path past the immovable 30 June date in constraint CON-1.	LO2	

Debrief check

Every one of your 25 rows has exactly one A and at least one R. Count them; do not assume.

Feedback

What did you find hardest in this activity?

What is the ONE thing you will do differently at work?
