Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Scope project requirements and build a business case, charter and traceable scope baseline that authorise delivery.
- LO2: Develop an integrated project plan with realistic schedule, cost and resource baselines using PERT, critical path and reserve analysis.
- LO3: Lead a project team through its development stages, applying leadership style, motivation theory and structured conflict resolution.
- LO4: Analyse project risk quantitatively and engage stakeholders through a planned communication and escalation cadence.
- LO5: Control delivery against baselines with earned value, flow metrics and statistical process control, then close the project and realise benefits.
- LO6: Apply the PMI PMP Examination Content Outline (ECO 2026) across all three domains and sit a full-format mock exam with domain score analysis.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.
- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.
